**Operational Technical Engineer · OT / Software / Data**

Ho Chi Minh City, Vietnam · eric.scorp93@gmail.com · +84 903 326 617 · th.io.vn

## PROFILE

OT engineer with a background in mechatronics and software technology. Experience supporting production networks, MES, line software, test equipment and data tools. Developing further expertise in data analysis and visualization.

## EXPERIENCE

### Operational Technical Engineer — Pepperl+Fuchs Vietnam

Jul 2026 — Present

Production network incident handling, software support, MES transfer support, technical reporting, process documentation and collaboration with Global OT and Vietnam IT.

### Operational Technical Support Engineer — Pepperl+Fuchs Vietnam

Mar 2025 — Jul 2026

Production network and software troubleshooting, error investigation and remote technical reporting. Supported the transfer of MES to Vietnam.

### Senior Assistant Test Engineer — Pepperl+Fuchs Vietnam

Jun 2023 — Mar 2025

Plant-wide calibration planning, test equipment issue analysis, production improvements and tools for retrieving and analyzing test data.

### Assistant Test Engineer — Pepperl+Fuchs Vietnam

Apr 2022 — Jul 2023

Calibration scheduling, equipment maintenance, repairs and software-assisted improvements to quality and task performance.

### Technician — Pepperl+Fuchs Vietnam

Sep 2019 — Apr 2022

Production equipment maintenance, repair and scheduled calibration to support operational continuity.

### Apprentice — Bosch Vietnam / TGA dual training

Oct 2016 — Sep 2019

Full-scholarship training with Lilama 2 International College of Technology. Foundations in mechatronics, PLC automation and industrial problem solving.

## EDUCATION

**Ho Chi Minh City University of Technology (HUTECH)** — Software Technology studies, Aug 2022 — Mar 2025.

**Lilama 2 International College of Technology** — Mechatronics, Oct 2016 — Sep 2019. Advanced Diploma Level 5 of VQF Mechatronics, Sep 2019.

## TECHNICAL SKILLS

C#, C++, Python, SQL, NoSQL; basic Java, HTML and CSS. Visual Studio, VS Code, Jupyter and GitHub. Networking, operating systems, hardware support, reporting and data analysis.

## PERSONAL PROJECTS

**ESP32 AI Assistant** — Owner / Developer, Jun 2026 — Present. Chatbot assistant built with an ESP32 development board. In development.

**Educational Games** — Owner / Developer, Jun 2026 — Present. Web-based learning games for children using visual and audio interaction. In development.
